

## Fish Extracts and Powders

**Kraeber is selling Seagarden and Maripro products in UK and other parts of Europe.**

**Seagarden** produces extracts and powders from fresh fish and crustaceans for food and feed, its subsidiary Maripro produces larvae feed for fish rearing and aquaculture.

**Seagarden products** find uses in soups, sauces, pastes, marinades or finished dishes. They are natural flavour enhancers or protein supplements in dietary meals. Target groups for the Seagarden products are not only consumer food and feed vendors but also manufacturers of pharmaceutical and special consumer diets or OTC products.

- Atlantic Lobster Powder
- Atlantic Shrimpshell Powder
- Fish Protein Extract
- Arctic Fish Powder
- Codfish Powder

**seagarden**  
arctic seafood ingredients

**Maripro products**, were created with the aim of providing an alternative form to live feed in the rearing of larvae in aquaculture. Developed for Ray finned fish the micro encapsulated, hydrolysed fish protein and oil have also been proven in the rearing of shrimps and other fish larvae.

- Minipro Larvae Feed is offered in different sizes according to larval species and age.
